

VENTILEX USA INC.

SPARE TIMES

VENTILEX Technicians Are Here To Help

Regularly scheduled maintenance on your VENTILEX system will help keep it running smoothly. An added benefit to your operation is a periodic checkup from a VENTILEX technician. If you have already booked your checkup with VENTILEX for the first quarter, then you are ahead of the pack. A VENTILEX technician can help tune and adjust your system, while also helping to suggest any areas that might need a spare part soon. Please contact our offices at (513) 874-4451 to discuss your schedule and book your technician today!

VENTILEX WOULD LIKE YOUR INPUT...

As needs change, VENTILEX likes to change with them to better serve our customers. One way of doing this is the option of paying for your spares orders with the use of a credit card. VENTILEX would like your input on how many of our customers would find this option useful and potentially use a credit card for payment on a regular basis.

[Click on the appropriate link below that best describes you: \(once you click on the link, click "send" in your email program\)](#)

Newsletter Spotlight

Regular maintenance keeps your VENTILEX system running at peak performance. Periodic checkups by a VENTILEX technician can help tune and adjust your system, as well as help suggest any upgrades available, or aid in spotting needed spare parts.

* SPARE PART SPOTLIGHT FOR FEBRUARY— BEARINGS

Split pillow block bearing housing

A crucial part to any VENTILEX shaking drive are roller bearings. Roller bearings are positioned on the drive to allow movement for the Eccentric Shaft, and the Drive Rod. These components allow the fluid movement of the Dryer Drive to provide the shaking motion for the Dryer, which is one aspect that sets apart VENTILEX systems from the competition.

You must keep a regularly scheduled maintenance program for the bearings to ensure proper lubrication and functionality. Without these bearings, the system cannot function as designed. A good rule of thumb is to make sure you have a replacement set of bearings at all times. It is difficult to obtain certain bearings in a shorter amount of time, so plan ahead and have replacements on hand.

To order or inquire about your VENTILEX system bearings, contact our offices at (513) 874-4451 today!
