VENTILEX USA
SPARE PARTS
NEWSLETTER**

NEW MONTHLY NEWSLETTER AN INFORMATIVE TOOL

Each month, VENTILEX USA INC. will be sending out a newsletter informing our customers about spare parts and maintenance. A spares spotlight will also highlight one particular part for each issue.

“Hey Santa...My VENTILEX Dryer system has a wish list too!”

As we are reaching the end of 2008, what plagues most of our thoughts during this yearly home stretch? Like a lot of us, budget planning for 2009, along with squeezing in those last minute purchases to get the most out of the remnants of the 2008 budget.

What better way of filling your VENTILEX'S wish list, while taking care of that last minute budget, than making sure your shelves are lined with extras of those critical spare parts. You know, the ones that give our production managers such a headache! We all know that feeling when your dryer system tells you it is in need of certain maintenance, you may reach for that spare part. OH NO! I need an extra

temperature probe, or flexible connection. However, that spot on the maintenance shelf is empty. There's no need to go through that. Just give VENTILEX a call or email now.

As we go forward with the holiday season, don't disappoint your VENTILEX System. When you have those extra spares that would normally keep your production from coming to a halt, you can sleep easy knowing that all those deadlines are kept.

Avoid those costly overnight shipping charges by having critical spare parts on the shelf. Call or email now to put in your order to replenish your spares compliment. Call our offices at (513) 874-4451 and our spare parts specialist will get your order processed before the end of the year.

PT100 Temperature Probe

One of the most common problems to dryer system issues can be traced to a faulty temperature probe. Make sure you have a few on hand at all times.
